weavcanada ONA Education Exhibit
Ontario Nurses Association

We collaborated with the Ontario Nurses' Association to create a dynamic, multimedia exhibit that greets nurses and visitors to their education centre. The exhibit is a highly visual telling of their proud history and current activity. ONA empowers its members to take collective action for safe, equitable workplaces and high-quality health care for all Ontarians. Their mission is to defend the rights of and advocate for nurses and health-care professionals who care for the health of

Oceana Canada

Liked by juliaaveber and 12 others
weavcanada Oceans cover 71% of the world. They are home to countless species and are critical to the health of our planet.

Oceana is a non-profit organization that works to recognize ocean protection to help keep our oceans clean for a more sustainable future. Having healthy waters restores ocean life and could feed 1 billion people every day. We are honoured to have worked with @oceana to develop their Toronto offices.

weavcanada Shifting Boundaries Exhibit

We worked with Evergreen and a team of artists and designers to create this dynamic and immersive installation. The exhibit draws on the insights of a group with specialist experience in developing cities and encourages visitors to consider themes of urban density, public space, and diversity. This is an evolving exhibition with repeated iterations to deepen engagement and create a one-of-a-kind gallery experience.

weavcanada Where Rocks Talk

Location: Evergreen Brick Works, Young Welcome Centre, 550 Bayview Avenue, Toronto ON

We worked with Evergreen to develop an exhibit that communicates the internationally significant geology found in the former Don Valley Brickworks quarry. In consultation with esteemed UofT glacial geologist Nick Eyes, we created a large-scale geological peel, as well as a display case that includes fossils, descriptions and interpretative videos that animate this complex geological story.

weavcanada SHN CIBC Breast Clinic
Scarborough General Hospital

We worked closely with SHN physicians and staff to refresh the clinic environment. The exercise enhanced the physician's room, waiting room, and reception area. Clinic physicians emphasized the importance of creating a place that feels inspiring and safe for patients. We are honoured to have worked with the SHN team to achieve this site-specific result.

weavcanada The completed look! Let the red curtain fall.

Immigrants Deepa and Narinder Lal had a hard start with their move to Canada. However, their push for innovation and progressive mindsets led them to become successful entrepreneurs. Their large 2019 donation to Scarborough Health Network resulted in having the emergency department named after them.

Weav is honoured to share their story and contribute towards this accomplishment.
